

PLEASE stop deregulating the media!!!

Now corporate intrests control what were supposed to be the people's government and the people's media. The ONLY real threat to the our beautiful country is that of unchecked Big Buisness. To bad our nation's founding fathers had no way to forsee the rise of huge corporations, because there is a huge power imbalance in this nation and the American people aren't even on the proverbial scale (Ben Franklin is rolling over in his grave).

Once again, the ONLY risk to the classic American ideals of freedom, liberty, and the public good, is from dollar driven Corporations and the "public" servants who are supposed to attend to the well-being of the people (but instead are sucking up to their cash cow buddies).

Power (of the media) to the people!!!

Let corporate America beware, I'm about to graduate and I'm angry with the state of our country. Don't underestimate the power of genius, the corrupt will be exposed and the ignorant masses will be informed!

I beg of the FCC, stop deregulation!

Signed a classic American,
Ben Johnson
